Advanced
Complete Aluminium Range

An aesthetically pleasing solution

Our aluminium windows and doors can provide many solutions for residential and light commercial applications. They can create traditional casement windows inspired by the elegance and styling of timber products, or contemporary style windows and doors designed for modern homes or offices.

Aluminium frames offer strength and durability and are highly resistant to rust. The frames utilise an innovative polyamide thermal break technology, which creates a barrier between the cold air outside and the warm air inside providing high thermal efficiency.

Aluminium Window Range

Our stunning windows encompass a timeless design together with high levels of security, energy efficiency and functionality. We offer two different window styles; a classic casement system and a modern flush casement system.

Classic Casement Windows Alitherm 800 Series

The Alitherm 800 range is designed for both residential and commercial projects that require the highest quality aluminium products. The range is fabricated using only the best aluminium polyamide materials making it not only very thermal efficient but also a fantastic addition to any property improvement project.

Flush Casement Windows Alitherm 800 Series

Our Alitherm 800 range is available in a beautiful flush exterior appearance. The flush style is a new design that means the window closes flush into the outer frame so it sits in line with the face of the window. The flush style is becoming increasingly popular due to its minimalistic clean lines and flat finish. The flush style is actually a very traditional design dating back more than 200 years. Back then windows were made of timber and they were all designed with flush fitting sashes and this feature is still this day today evident in many Georgian, Victorian and Edwardian properties.

PAS 24 Security Upgrade

Our Alitherm 800 Series come with the option to upgrade the security to our PAS 24:2016 security package. PAS 24 is a set standard with specifications as to which our aluminium windows have been tested against. The PAS 24 upgrade includes hinge protectors and anti lifting blocks. The upgrade is generally mandatory on new-build projects.

Window Furniture

The handles are supplied as standard with a key locking facility, however should you opt to have a window with a fire escape opening hinge then the handle will be non-locking as standard. Utilising a multipoint locking mechanism, internal key locking handles and internal beads our aluminium range offers the highest level of security as standard.

Aluminium Sliding Patio Doors

Our aluminium sliding patio door is suitable for use as either sliding commercial entrances where large opening apertures are required, or as dynamic residential sliding doors that maximise light and give stunning unimpeded views. The sliding doors are the perfect solution for modern and stylish properties featuring advanced technology that is characterised by a slim aluminium frame and large glass units that give you an explicit transition from the inside out. The large panels of glass will inevitably open up your home and provide it with great light filled spaces.
